

PA PINCH VALVE DN 25 - 300 (DN 1" - 12")

The PA model pinch valve is a heavy-duty enclosed construction full bore valve that employs elastomer sleeves for flow shut-off and control in applications with abrasive and corrosive slurries. The sleeve is the only part in contact with the media, no other mechanical parts are required, and it is a maintenance free part. The PA sleeve design eliminates dead spots where slurry can build up
